To Whom It May Concern,

As the Associate Director of Web Development at 829 Studios, I am delighted to recommend Yury Korol, an exceptionally skilled and versatile full-stack Drupal developer. Having worked closely with Yury on numerous projects over the past year, I have consistently been impressed by his technical expertise, dedication, and collaborative spirit.

Yury has demonstrated exceptional abilities in managing complex Drupal upgrades and migrations for large, enterprise-level websites supporting multiple language regions. His deep understanding of Drupal's architecture is evident in his custom module development and the thoughtful patches he has contributed to improve functionality of popular Drupal modules. Yury's troubleshooting and problem-solving skills are exceptional, allowing him to tackle new challenges with a positive attitude and always meet deadlines.

Beyond his Drupal acumen, Yury is a talented full-stack developer. He builds robust components from scratch, handles both front-end and back-end development responsibilities, and seamlessly integrates Drupal with other platforms like Salesforce and Marketo. Yury's work with Google Tag Manager and custom DataLayer scripting has been particularly valuable, enabling us to enhance the data collection and reporting capabilities of our Drupal websites.

Yury's proficiency extends to deployment management on platforms like Acquia, as well as server-side troubleshooting, including mitigation of bot traffic issues using Cloudflare. His reliability and collaborative mindset make him a true asset to any cross-functional team.

In addition to his impressive technical skills, Yury stands out for his continuous learning mindset. He is always eager to explore new Drupal features and techniques, ensuring he delivers innovative solutions to meet evolving project requirements.

Without reservation, I recommend Yury Korol for any web development role. He will be a tremendous asset to your team, and I am confident he will make significant contributions to your organization.

Sincerely,  
Tom Lichaj  
Associate Director of Web Development
